

Power to enable users

**Self-Service**  
for sage

## Interactive answers on demand

Simple query capability via email and SMS to all your Sage Line 500 data

### *Put the power of Sage Line 500 in your pocket*

**Data, it's a company's most valuable asset and often the hardest to access.** Report generators and data analysis tools can help gather data when you've got the time, and are in your office.

**But what about when you just have a specific question?**

**Get your answer right now!**

**Self-Service for Sage** from Magic Software allows you to access data residing within Sage as easily as sending a text message or email. Simply send your pre-formatted request and the response is returned almost immediately.

Easy to implement and simple to learn, this tool will dramatically increase the accessibility of your data and increase the satisfaction of users.

**Ready to run requests  
Out of the box...**

**internal users:**
