

## 'TRACE IT' PRODUCT TRACKING SYSTEM

### OVERVIEW:

'TRACE IT' allows product details to be captured at every stage of the product life cycle from receipt \ production to possible customer return

### FEATURES:

- Easy to use
- Easy to manage
- Easy to implement
- Fully integrated to intelligent indicators e.g. computerised weighing scales, WIFI weighing scales, Bluetooth weighing scales
- Can be linked to 'back office' systems e.g. Sage, SAP BO, ...
- User defined processes can be defined and implemented quickly
- Web based reporting
- Can utilise bar code scanners
- Uses latest Microsoft Technology

### BENEFITS:

- Quick return on investment
- Ability to cater for product traceability e.g. food traceability
- Can easily adapt to business changes
- Stock \ accounting information can be exchanged with 'back office' systems e.g. Sage, SAP Business One, ...
- Can be run independently of 'back office systems e.g. user defined returns processes
- Consolidated bar codes can be used to capture multiple data records in one go

### DEPLOYMENT OPTIONS:

There are 2 options depending on your requirements:

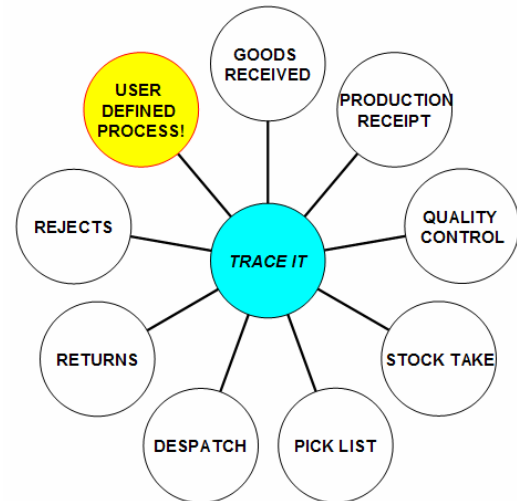

- Red IT hosted solution requiring just an internet connection
- Local install for very high volume sites \ computerised weighing scales

### PRODUCT ARCHITECTURE:

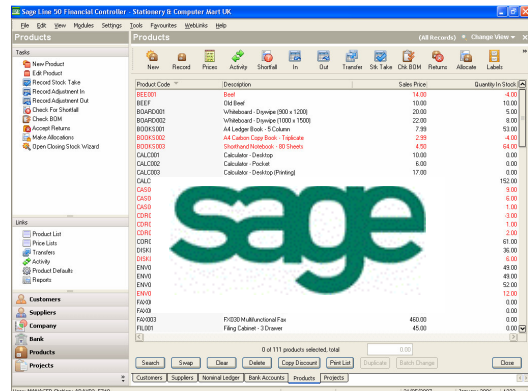

- Microsoft SQL Server 2005
- Microsoft Reporting Services
- Microsoft Integration Services
- Microsoft Internet Information Services : ASP
- Internet Explorer 7
